ABOUT THE TOUR

Have you walked the pathway under the south end of the Cambie Bridge? If you've visited since August 10, 2021 when the art installation was launched, you will have noticed some creative activity in this space!

The installation is called Voxel Bridge and is by artist Jessica Angel, you can learn lots more about it on this walk

If you've heard the words "blockchain" or "augmented reality" in the news lately and have not understood their meanings, walk on to explore and learn more. Download the QR code from the onsite signage, and activate the free app to fully experience the intersection of art and technology.
